

QR code generator

BY AZIRI
@M.ME/MOHDZIRI

Generate QR Code using fb chatbot.

WHAT YOU NEED

1. Server with PHP
2. QR code API : <http://goqr.me/api/doc/create-qr-code/>

STEP BY STEP

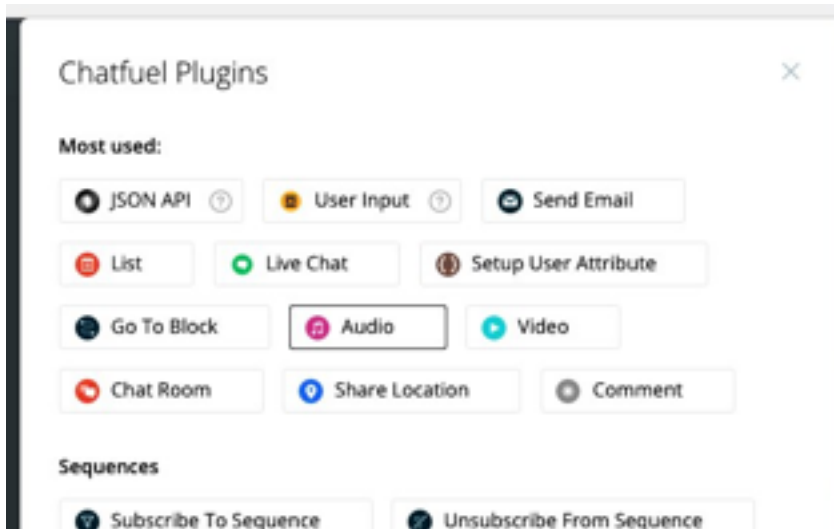

1. Create a new bot
2. Create block call getQR

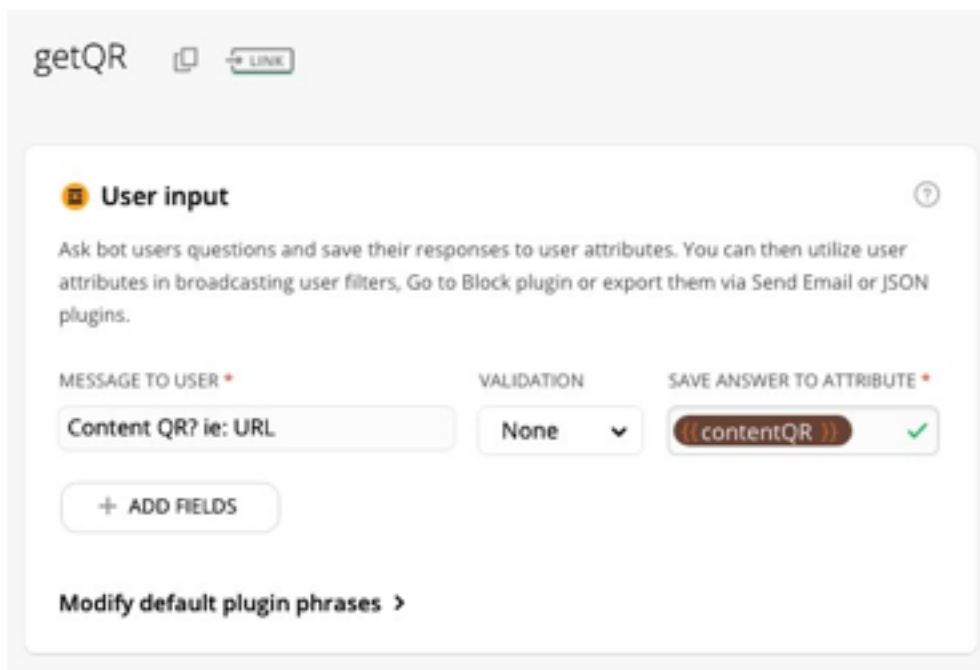

3. getQR block > Add a new card > Click + button.

4. Chatfuel Plugins windows > Click User Input

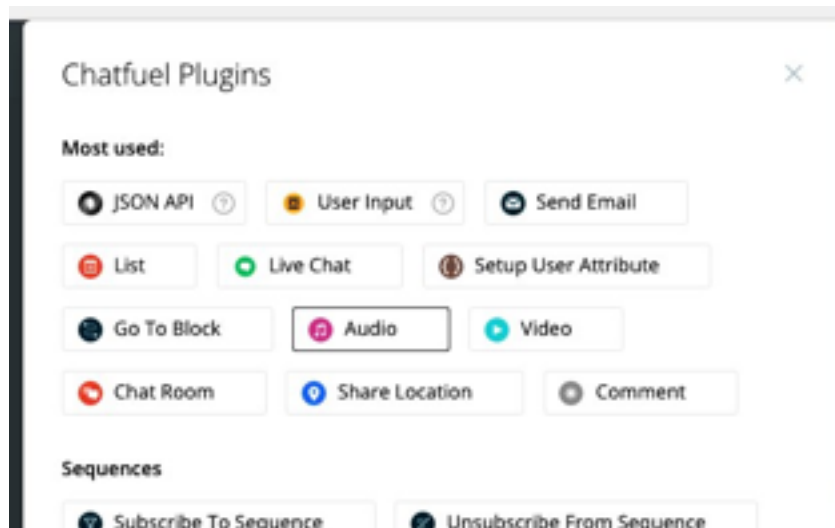

5. User Input card > Create message to user (refer User Input card)

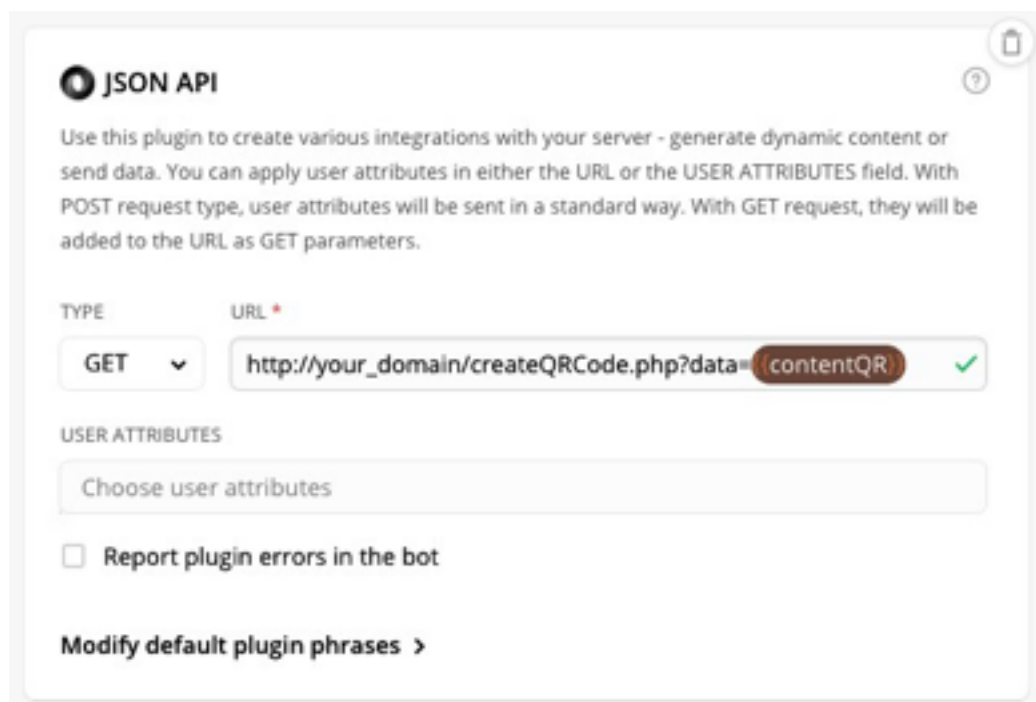

6. After that, Add a new card below User Input card and then Click +.

7. Chatfuel Plugins windows > Click JSON API

8. JSON API > Insert your server URL with type GET.

9. Copy and paste file createQRCode.php to your server.

10. Done.
