

# Detect language from chat bot and Translate reply message to detected language using Yandex Translate API

BY AZIRI  
@M.ME/MOHDАЗIRI

Scan/read QR code content using FB chatbot.

## WHAT YOU NEED

1. Server with PHP

2. API doc :

Detect Language:

<https://tech.yandex.com/translate/doc/dg/reference/detect-docpage/>

Translate Language

<https://tech.yandex.com/translate/doc/dg/reference/translate-docpage/>

## STEP BY STEP

1. Create a new bot
2. Create block call detect & translate lang
3. Add new card > User Input

**User input**

Ask bot users questions and save their responses to user attributes. You can then utilize user attributes in broadcasting user filters, Go to Block plugin or export them via Send Email or JSON plugins.

MESSAGE TO USER *	VALIDATION	SAVE ANSWER TO ATTRIBUTE *
Write anything to us in your preferred language.	None	{{ userInput }}

+ ADD FIELDS

[Modify default plugin phrases >](#)

#### 4. Add New Card > JSON API

 **JSON API**

?

Use this plugin to create various integrations with your server - generate dynamic content or send data. You can apply user attributes in either the URL or the USER ATTRIBUTES field. With POST request type, user attributes will be sent in a standard way. With GET request, they will be added to the URL as GET parameters.

TYPE

URL \*

GET ▼

http://YOUR\_SERVER\_URL/dynamicTranslate.php?text={{userInput}}

USER ATTRIBUTES

Choose user attributes

☒ Report plugin errors in the bot

**Modify default plugin phrases >**

5. Make sure to copy and paste file dynamicTranslate.php to your server
6. Done!!!
